CERTIFIED MAIL - RETURN RECEIPT REQUESTED

December 16, 1998

TO: De minimis Parties Listed in Attachment "A"

RE: Malvern TCE Superfund Site
De Minimis Settlement Offer

Dear De Minimis Parties:

This letter constitutes the final de minimis settlement offer issued by the United States Environmental Protection Agency ("EPA") with regard to the Malvern TCE Superfund Site ("Site"). A list of those potentially responsible parties ("PRPs") for the Site that are eligible to participate in this de minimis settlement is enclosed (Attachment "A").

Due to the relatively small amount of hazardous materials that your company contributed to the Site, EPA is offering your company an opportunity to settle as a de minimis party. As a de minimis party, in return for a specified cash payment, EPA will agree not to sue or take any other civil or administrative action against your company with regard to the Malvern TCE Site.

The terms of this final de minimis settlement offer are set forth in the Final Administrative Order on Consent for De Minimis Settlement ("Final Consent Order") (Attachment "B"). Information describing the volume of waste attributed to each PRP and the projected total payment due under the terms of the settlement is set forth in Generator and Broker/Transporter Volumetric Ranking Summaries dated November 30, 1998 ("November 1998 VRS"). The November 1998 VRS are attached to the Final Consent Order as Appendix "C."

I. Settlement Background

This final de minimis settlement offers follows a letter dated April 30, 1998, in which EPA notified PRPs for the Site of the opportunity to participate in a de minimis settlement. With that letter, EPA enclosed a Draft Administrative Order by Consent ("Draft Consent Order") setting forth the terms by which PRPs that are eligible for this de minimis settlement, pursuant to the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 ("CERCLA"), as amended, 42 U.S.C. § 9601, et seq., could conclude their liability to the United States for response costs incurred or to be incurred at the Site. Also enclosed in EPA's April 30, 1998 letter, were Generator and Broker/Transporter Volumetric Ranking Summaries dated April 27, 1998 ("April 1998 VRS"), which listed the volume of waste attributed to each PRP and projected total payment due under the terms of the settlement embodied in the Draft Consent Order.

Customer Service Hotline: 1-800-438-2474

Subsequent to the mailing of the Draft Consent Order, EPA met with representatives of a Site De Minimis PRP Group, responded to numerous telephone calls from PRPs or their attorneys, and received and considered comments submitted by a number of PRPs with respect to the proposed settlement in general and specific terms set forth in the Draft Consent Order.

EPA's response to the comments received from these various sources is reflected in the enclosed Final Consent Order, which modifies some important and substantive terms of the Draft Consent Order.

Subsequent to the mailing of its April 30, 1998 letter, EPA also revised the April 1998 VRS in order to reflect changes required as a result of: 1) recently discovered data inputting errors that appeared in the April 1998 VRS¹; 2) review and/or reconsideration of PRP challenges that had been submitted by PRPs (during the challenge periods provided by EPA) to prior draft volumetric summaries, including the April 1998 VRS; and 3) identification of additional broker/transporter transactions relating to the Site.

II. Summary of Settlement Offer in this Final Consent Order

A. Eligibility

The eligibility criteria remain unchanged. Small waste contributors eligible for de minimis settlement have been identified by EPA by utilizing information set forth in the November 1998 Summaries. A PRP is eligible to participate in this settlement if its volumetric contribution of hazardous substance to the Site is at or less than .75% of the total volume attributed to the Main Plant Area ("MPA") of the Site, as set forth in the November 1998 Summaries.² Generator PRPs should refer to the "MPA %" column contained in the Generator VRS in order to determine their MPA %. Broker/transporter PRPs should add their MPA % listed on both the Generator VRS and the Broker/Transporter VRS, in order to determine their total MPA %.³

¹ During EPA's review of the April 1998 VRS prior to this mailing, a number of data entry errors were detected and corrected. These corrections led to a decrease in drum counts for a number of PRPs. As a result, most parties listed in the August 1998 VRS will have an increase in volume due to the decrease in total drums transported to the Site.

² EPA has established a de micromis cutoff at 1.5 drums or less. At present, EPA does not foresee a need to pursue settlements with de micromis parties. EPA will, however, pursue settlements with de micromis parties if there is a threat of, or an actual suit by, other PRPs at the Site.

³ Please refer to the documents entitled "Malvern TCE Volumetric Ranking Summaries Overview and Methodology" and "VRS Explanation Sheet" (Attachment "C"), for a

In signing the Final Consent Order, each De Minimis Respondent will certify that the company it represents qualifies for the de minimis settlement eligibility terms (See Final Consent Order, Section X, Certification). Please note that under the terms of the settlement, the United States may void the agreement with respect to any individual party if, among other things, a De Minimis Respondent contributed more than .75% of the total volume attributed to the MPA, or if the certification provided by the De Minimis Respondent is false or materially inaccurate.

Please note that this may be the only de minimis settlement offer that EPA will make in this case. You should be aware that if you do not join in the de minimis settlement, you may continue to be potentially liable to EPA and/or for contribution to other parties at the Site.

B. Amount of Cash Payment

The Final Consent Order establishes a total payment each eligible PRP must pay to settle its liability to the United States. This total payment is reflected in the "Total De Minimis Payment" column provided in the November 1998 VRS. The total payment consists of the following costs relating to the Site:

- (1) a payment amount for past costs incurred by EPA;
- (2) a payment for estimated future costs; and
- (3) a premium added to the estimated future costs.

The payment amounts provided in the November 1998 VRS are based on calculations of estimated costs for cleanup of the Site. For purposes of the de minimis settlement, total future response costs are based on estimates set forth in the Record of Decision issued by EPA in November 1997 for the Site.

C. Installment Payments

In response to comments received from PRPs to the Draft Consent Order, EPA has included in its cost estimates only remedial, not removal, oversight costs. Remedial oversight costs are estimated to be \$200,000.00. This reduction in oversight costs included in the costs estimates is consistent with the decision by the Third Circuit Court of Appeals in United States v. Rohm and Haas, 2 F.3d 1265 (3d Cir. 1993).

EPA has been asked by PRPs to consider installment payments in order to encourage participation in this de minimis settlement by those parties that are willing to enter into a settlement but would be unable to participate unless given an opportunity to make payments over a longer period of time. In response to these requests, EPA has provided in the Final Consent Order an installment payment option pursuant to which a party may pay its de

more detailed description of the methodology utilized and information contained in the November 1998 VRS.

minimis settlement payment in two equal installments. The first installment will be due within thirty (30) calendar days of the effective date of the Consent Order, and the balance will be due within one year of the effective date of the Consent Order.

D. Failure to Make Payment

Please note that pursuant to Section IX of the Consent Order, if any De Minimis Respondent fails to make payment within thirty (30) calendar days of the payment becoming due, the Consent Order shall be terminated as to that De Minimis Respondent. Late payments (those paid after the due date but within thirty (30) calendar days of the payment becoming due), shall accrue interest, which shall be assessed to such De Minimis Respondent.

E. Covenant Not to Sue

In return for the cash payment specified in the November 1998 VRS, EPA will provide the Covenant Not to Sue as set forth in Section XI, Paragraph 26, of the Final Consent Order. The settlement also provides protection against contribution actions that could be brought against De Minimis Respondents concerning the Site, to the extent provided in Sections 113(f)(2) and 122(g)(5) of CERCLA, 42 U.S.C. §§ 9613(f)(2) and 9622(g)(5).

F. Form of the Settlement

This settlement offer is being made only to the addressees of this letter, for a limited period of time. Should you wish to accept this settlement offer, you must do so in accordance with the terms provided in the Final Consent Order. Following the period that you have for joining the settlement, EPA will initiate a thirty (30) day public comment period pursuant to Section 122(i) of CERCLA, 42 U.S.C. § 9622(i). At the completion of the comment period, EPA will execute the agreement, unless it modifies or withdraws its consent pursuant to Sections XVI and XVII of the Consent Order.

G. Required Actions for Participation in this Settlement

(1) Deadline for Submission of Signature Pages

In order to join this settlement, you must execute and submit to EPA a signed signature page to the enclosed Consent Order by January 29, 1999.⁴ **DO NOT SEND ANY SETTLEMENT PAYMENT AT THAT TIME.**

⁴ De Minimis PRPs that have raised ability to pay concerns with EPA may defer indicating their acceptance of this offer until after EPA has reviewed and analyzed these parties' financial claims.

(2) Contact Person

Please forward your signature pages to:

Joan A. Johnson (3RC41)
Assistant Regional Counsel
United States Environmental Protection Agency
Region III
1650 Arch Street
Philadelphia, PA 19103-2029

(3) Deadline for Payment and Mechanics of Payment

Sometime after January 29, 1999, EPA will notify those parties that have executed and submitted their signature pages in a timely manner of the effective date of the Final Consent Order (refer to Section XIX, Paragraph 40, Effective Date). You will then have thirty (30) days from EPA's issuance of notice of the effective date to make the payment required by the Final Consent Order. **Do not send a payment until the EPA notifies you that the Final Consent Order is effective.**

If you have any questions about the terms of the Final Consent Order or with respect to information relating to your company as set forth in the November 1998 VRS, please direct your inquiries to:

Joan A. Johnson (3RC41)
Assistant Regional Counsel
United States Environmental Protection Agency
Region III
1650 Arch Street
Philadelphia, PA 19103-2029

Please be advised that this letter is sent for informational purposes only and cannot substitute for a careful review of the Final Consent Order.

Sincerely,

Joan A. Johnson
Assistant Regional Counsel

**Volumetric Ranking Summaries/
Overview and Methodology**

**Volumetric Ranking Summaries/
Challenges and EPA's Response**

Malvern TCE Volumetric Ranking Summaries/Overview and Methodology

This document provides a general overview and describes methodology utilized by EPA in the preparation of the Malvern TCE Superfund Site ("Site") Volumetric Ranking Summaries dated November 30, 1998 ("Summaries"). A description of *de minimis* settlement eligibility and requirements also is provided.

I. VOLUMETRIC RANKING SUMMARIES: OVERVIEW

The volumetric ranking summaries reflect revisions made by EPA to draft Site volumetric ranking summaries prepared by EPA and distributed to potentially responsible parties ("PRPs") for the Site on November 3, 1997 and April 30, 1998. Among other things, the attached Summaries incorporate information obtained by EPA as a result of: a) EPA's review and/or reconsideration of challenges submitted by PRPs to EPA to prior draft Site volumetric ranking summaries; b) review by EPA of Site records; and c) EPA research into the continued existence and viability of various PRPs identified in connection with the Site.

A. Generator and Transporter Volumetric Ranking Summaries

EPA has prepared two volumetric ranking summaries for the Site: a Generator Volumetric Ranking Summary ("Generator VRS") and a Broker/Transporter Volumetric Ranking Summary ("Broker/Transporter VRS"). As a result of EPA's review of Site records documenting transactions between PRPs and Chemclene, a number of brokers/transporters have been identified. The Summaries are intended to reflect all generator and broker/transporter PRP transactions at the Site and to attribute to each generator and broker/transporter identified at the Site, the full volume of waste into the Site contributed by each, as reflected in Site records. All documented shipments of waste to the Site are reflected in the Generator VRS; transactions involving brokers/transporters also are reflected in the Broker/Transporter VRS. See Section II.D. of this Overview and Methodology for additional details relating to generator and broker/transporter transactions.

B. Information contained in Summaries

In general, the attached Summaries provide the following for each PRP:

1. The volume of waste each PRP contributed to the Site.

This volume reflects, for each PRP, the total volume of waste, as measured in 55-gallon drum units, each PRP contributed to the Former Disposal Area ("FDA") and the Main Plant Area ("MPA") of the Site, areas used by Chemclene as part of its operations. These amounts are reflected in the "FDA Drums" and the "MPA Drums" columns of the Summaries. See Section II.B.3. of this Overview and Methodology for details regarding EPA's methodology

relating to the FDA and MPA.

2. The percentage of waste each PRP contributed to the FDA and MPA.

This percentage reflects each PRP's percentage of waste contributed to the FDA and MPA, relative to the percentage of total waste sent by all PRPs to the FDA and MPA, respectively. These percentages are reflected in the "FDA %" and "MPA %" columns of the Summaries.

3. The revised percentage of waste each PRP contributed to the FDA and MPA.

EPA has determined that some Site PRPs are no longer financially viable corporate entities, and, therefore, are Site "orphans" that will not participate in any *de minimis* settlement with EPA. These orphan shares have been apportioned on a *pro rata* basis among non-orphan Site PRPs. This apportionment is reflected in the "Revised FDA %" and "Revised MPA %" columns of the Summaries.

4. De minimis settlement payment required of each settling de minimis PRP.

The Summaries include each eligible *de minimis* PRP's share of costs such PRP will be required to pay in order to participate in a *de minimis* settlement with EPA. The total payment required of each *de minimis* PRP is reflected in the "Total Payment" column of the Summaries. The total payment required of each PRP includes each PRP's share of costs associated with the FDA and MPA, as set forth in the "FDA Cost" and "MPA Cost" columns of the Summaries. In addition, the total payment required of each PRP includes a premium payment assessed by EPA to take into account remedy and cost risks assumed by EPA in connection with the Site and the *de minimis* settlement. The premium is not assessed on EPA's past costs, but only on the estimated future costs. Premiums are reflected in the "FDA Premium" and "MPA Premium" columns of the Summaries.

See the Explanation Sheets attached to the Summaries for additional details regarding the information contained in the Summaries.

II. **METHODOLOGY UTILIZED BY EPA WHEN CREATING THE VOLUMETRIC RANKING SUMMARIES**

A. Documents Used

The Summaries prepared for the Site were compiled using Site documents obtained by EPA from Chemclene. These documents, which include invoices, receipts, purchase orders, manifests, and a number of other related documents, refer to transactions dating from 1968 until 1992 between Chemclene and its customers. These documents memorialize a number of

different types of transactions, reflecting the varied nature of Chemclene's business and Chemclene's changing billing practices. Examples of the transactions reflected in the documents include, but are not limited to:

1. Shipment of solvent and non-solvent waste from waste generators to Chemclene for processing and/or disposal;
2. Transshipments of solvent and non-solvent waste from Chemclene to other treatment, storage and disposal facilities;
3. Transfer of reclaimed solvents from Chemclene back to the original waste generator;
4. Transfer of raw or reclaimed solvent from Chemclene to customers;
5. Return of unused solvents or unused empty drums from customers to Chemclene;
6. Transfer of empty drums from Chemclene to waste generators to be filled up with wastes;
7. Purchases of raw materials by Chemclene;
8. Sale of services (such as waste sampling or transport services) by Chemclene to customers; and
9. Charges by Chemclene for off-Site disposal of still-bottoms resulting from the on-Site processing of wastes.

B. Interpretation of Documents

1. Waste into the Site

Based upon its understanding of Chemclene's operations, EPA has assumed that any unit of waste shipped to the Site was just as likely to have become a contaminant in the environment as any other unit of waste.

In preparing the volumetric ranking, EPA has examined carefully the Site documents to determine which transactions indicate the shipment of waste to Chemclene, and to determine the volume of these shipments.

The majority of transactions reflected in the Summaries are documented by a Chemclene invoice. In many instances, however, there are other documents that reveal the

details of the transaction more clearly than the invoice. For most transactions, the nature of the transaction is clear regardless of which document is examined. However, in some cases the nature of the transaction becomes clear only by comparing two or more documents. In all instances, EPA looked at all of the documents related to a transaction before determining how to interpret the documents.

2. Time Period Summarized

For purposes of preparing the VRS, EPA reviewed and summarized existing Site documents, which refer to the 1968 to 1992 time period. EPA is aware that Chemclene operations at the Site commenced in approximately 1952. However, since EPA does not have information relating to the 1952 to 1968 period of Chemclene operations, EPA has made no assumptions regarding waste transactions during that time period, and has not attempted to summarize waste transactions during that time period. Available information indicates that Chemclene withdrew its Part B Application submitted pursuant to the Resource Conservation and Recovery Act ("RCRA"), 42 U.S.C. § 6901 *et seq.*, to operate as a treatment and storage facility, and stopped accepting waste solvent for reclamation in July 1992.

3. Main Plant Area and Former Disposal Area

Information available to EPA indicates that Chemclene utilized both the MPA and FDA as part of Chemclene's operations. At all times during its operation, until approximately July 1992, Chemclene utilized the MPA to receive, accumulate, store, and process wastes, including hazardous substances. All wastes sent to the Site initially went to the MPA. Wastes, including hazardous substances, also were released and disposed of at the MPA as a result of Chemclene's operations. Chemclene also disposed of wastes, including hazardous substances, at the FDA. Chemclene claims that disposal at the FDA ceased when new management took over the business in approximately August 1975, at which point Chemclene discontinued use of the FDA and disposed of waste generated from the reclamation process off-Site.

Based upon the foregoing information, when preparing the volumetric ranking summaries for the Site, EPA counted all waste transactions between Chemclene and PRPs during the 1968 to August 1975 time period as waste into both the MPA and the FDA. EPA has counted waste transactions between Chemclene and PRPs after August 1, 1975, only as waste into the MPA.

The distinction between the MPA and the FDA is meaningful in two ways: a) in the setting of the cut-off delineating which PRPs may be eligible to participate in a *de minimis* settlement; and b) in determining the amount of monies eligible *de minimis* PRPs will be required to pay in order to participate in a *de minimis* settlement with EPA.

Each PRP's eligibility for *de minimis* status will be determined using the percentage of the total waste sent to the Site by the PRP. This percentage is set forth in the

"MPA %" column of the Summaries, since all waste into the Site was received and processed by Chemclene at the MPA.

The Site remedy selected by EPA in its Record of Decision dated November 26, 1997, has provided for distinct remedies for the MPA and FDA. Even though significant aspects of the cleanup of the MPA and the FDA may be combined, EPA believes that costs of the remedy can be allocated fairly between the two areas. EPA separately has calculated the *de minimis* settlement payments of each eligible *de minimis* PRPs for the MPA and FDA and has added these amounts to obtain a "Total Payment" required.

4. Transshipments

Based upon EPA's understanding of Chemclene's operations and review of Site records, EPA has determined that some waste received by Chemclene at the Site likely was transhipped off-Site, e.g. shipped off-Site for processing and/or disposal. Information available to EPA indicates that Chemclene often would containerize and store at the Site these wastes for off-Site shipment at some later date, and that releases or threatened releases of these wastes at the Site occurred as a result of Chemclene's practice.

EPA did not count as waste into the Site, transactions that appear to reflect that waste was sent off-Site for processing or disposal *only* in those instances where EPA could document, typically through its review of waste manifests, that such wastes remained in their original shipping containers and were not bulk-stored or otherwise opened and handled on-Site, prior to off-Site shipment.

C. Units of Measurement

To the extent applicable, EPA has prepared the volumetric ranking in accordance with OSWER Directive 9835.16, "Guidance to Preparing and Releasing Waste-In Lists and Volumetric Rankings to PRPs Under CERCLA," dated February 22, 1991. The most common unit of shipment was the 55-gallon drum, and therefore all other units found in the documentation were converted to 55-gallon drum units. When units were listed in gallons or other units of volume, simple mathematics was used to convert into drum units. For those entries with less than 55 gallons, a decimal was used. For example, if the documents indicated ten 30-gallon containers of waste shipped to Chemclene, then the 300 gallons of waste would be divided into 55-gallon units yielding 5.45 drums.

In a comparatively few instances, shipments of waste were listed in units of weight or other units. In these instances EPA used the following assumptions:

- For those entries listing pounds as the measurement unit, EPA's standard conversion factor of 1 gallon = 8.33 pounds was extrapolated to 55 gallons = 458 pounds.

- 1 can = 5 gallons.
- 1 bottle = 1 gallon.
- 1 lab pack = 1 gallon.

In addition, a small number of transactions indicated the shipment to Chemclene of "empty" drums or other containers which are listed as "used" or "dirty" or some other language indicating that the container had at one time contained waste. In these instances EPA assumed that the container contained 3% of its capacity in hazardous wastes, based upon the definition of "empty" in the RCRA regulations. *See* 40 C.F.R. § 261.7.

D. Brokers/Transporters

As a result of its review of Site documents, EPA has identified a number of PRPs that appear to have acted as brokers and/or transporters of waste to the Site. EPA has included broker/transporter PRPs in the Summaries.

Most Site records that identify brokers/transporters refer to brokers/transporters with whom it appears Chemclene dealt directly. A number of Site records, for example, reflect that Chemclene directly billed and/or credited such brokers/transporters with regard to waste transactions at the Site.

The Site records that refer to broker/transporter PRPs identify two types of transactions: 1) transactions in which a broker/transporter appears to have arranged for the transport or disposal of or transported waste generated by a third-party to the Site, and in which both the broker/transporter and the generator are expressly identified in the corresponding Site record; and 2) transactions between a broker/transporter and Chemclene where no third-party generator has been identified. In the latter instance the documentation is the same as for any other generator, and the party listed on the documentation is thus treated as a generator for those transactions, even if the same party may have acted as a broker/transporter in other instances.

Consistent with OSWER Directive 9835.16, whenever a Site record reflects a transaction in which both a generator PRP and a broker/transporter PRP are expressly identified, EPA has attributed the waste volume referred to in each such transaction to both the generator and the broker/transporter for purposes of compiling waste-in information contained in the Summaries. However, EPA has counted the total waste referred to in these transactions only once for purposes of determining total waste contributed to the Site by all PRPs.

The Generator VRS summarizes waste volume information: 1) for each generator PRP; and 2) for each broker/transporter PRP only with regard to those broker/transporter transactions with Chemclene for which no corresponding third-party generator has been identified. As set forth above, in cases where a third-party generator is not identified, the party named on the

invoice or other documentation has been treated as a generator for that transaction even if the party involved has been identified as a broker/transporter for other transactions.

The total waste contributed to the Site by all PRPs appears at the end of the Generator VRS.

EPA has prepared a separate Broker/Transporter VRS in order to summarize those waste-in transactions in which both a broker/transporter and a generator have been identified. The waste volume reflected in these transactions also has been summarized for each corresponding generator in the Generator VRS. By preparing a separate Broker/Transporter VRS, EPA can attribute to each broker/transporter the waste reflected in these transactions, but avoid double-counting the waste when determining total waste contributed to the Site by all Site PRPs (as reflected in the Generator VRS).

Broker/transporter PRPs should refer to both the Generator VRS and the Broker/Transporter VRS in order to determine waste volume and percentage information.

For purposes of a *de minimis* settlement, both the generator and the broker/transporter will be liable for the full amount of the waste in a transaction involving both a generator and a broker/transporter. In other words, for some shipments two parties both will be fully liable for the share of the cleanup represented by those drums. However, parties can avoid full liability if the broker/transporter and the generator cooperate with each other and agree to an allocation between themselves. In such instances, the broker/transporter and the generator may *jointly* settle with EPA for the full amount of the wastes in question, and avoid having to *each* pay for the wastes.

E. Grouped PRPs

Based upon information obtained by EPA, EPA has concluded that some Site PRPs are related or successor entities to other Site PRPs. EPA has grouped related/successor entities in the attached Summaries. For each such grouping, EPA has determined the grouping's total volume and percentage liability at the Site based upon the combined totals of each related/successor entity. Total volume and percentage information for each grouping is set forth in the Generator VRS that is arranged alphabetically by PRP. Total volume and percentage information for each grouping is set forth under the name of the PRP grouping and appears in bold print. Volume and percentage information for each separate related/successor PRP member of the grouping also is set forth in the Summaries.

F. Orphan PRPs

When a PRP is unable to pay all or part of its allocated share of a cleanup, EPA may allocate such a share among the viable PRPs in the same ratio as other cleanup costs. Pursuant to EPA's "Orphan Share" policies, EPA, under certain circumstances, may pay (from the

Superfund) a portion of the shares of PRPs that are completely non-viable. Orphan share funding may be available only to PRPs that agree to implement and fund remedial actions at a site, and not to *de minimis* PRPs. *De minimis* PRPs may be asked to pay on a *pro rata* basis for any shares for which the orphan PRPs are unable to pay. In addition, the *de minimis* premium will take into consideration the likelihood that additional such shares will be identified subsequent to the conclusion of the *de minimis* settlement.

When EPA has been able to identify a PRP as an orphan in the attached summaries, EPA has included for each such PRP, total volume and percentage information. EPA does not anticipate that Site orphans will participate in the *de minimis* settlement or otherwise pay monies towards Site remediation. Therefore, EPA has not included payment information for any Orphan. In addition, EPA has revised each non-Orphan PRP percentage ("Revised FDA %" and "Revised MPA %"), reflecting each non-orphan PRPs *pro rata* payment share for each Site orphan.

The calculation of the revised percentages has been done on a transaction by transaction basis. If a transaction involves an orphan generator, then the transaction was checked to determine if there was a broker/transporter for the same transaction. A transaction has been divided on a *pro rata* basis among the remaining PRPs only if there is *neither* a viable generator *nor* a viable broker/transporter for the transaction.

III. ***DE MINIMIS* SETTLEMENT**

A. *De Minimis* Cutoff

EPA has established a cut-off for *de minimis* settlement eligibility using a percentage of the total waste sent to the Site by the PRP. A PRP is eligible to participate in a *de minimis* settlement if its volumetric contribution of hazardous substances to the Site is at or less than 0.75% of the total volume attributed to the MPA. Pre-August 1975 percentages that have been assigned for the FDA have not been considered by EPA when establishing the *de minimis* settlement eligibility cutoff. However, such percentages have been considered by EPA when determining the amount of money each *de minimis* PRP will be asked to pay if it desires to settle.

EPA has also established a *de micromis* cutoff at 1.5 drums or less. EPA does not foresee a need for settlements with *de micromis* parties. EPA will, however, pursue settlements with *de micromis* parties if there is a threat of, or an actual suit by, other PRPs at the Site.

B. *De Minimis* Payments

The attached Summaries contain *de minimis* settlement payment information for each eligible *de minimis* settlement. EPA has divided the costs of the selected remedy, as set forth in the ROD, between the MPA and FDA, and has determined each *de minimis* PRP's required settlement payments for each of these areas of the Site. A PRP's required *de minimis* payment is

determined based upon its revised percentages for the FDA and the MPA. These revised percentages are then applied to the total costs estimates for the MPA and the FDA.

As of June 17, 1997, EPA incurred approximately \$2,214,705.00 in response costs ("Past Response Costs") at or in connection with the Site. Since EPA incurred the Past Response Costs as a result of activities that pertained to both the FDA and MPA, EPA has attributed one-half (\$1,107,352.00) of the Past Response Costs to FDA costs and the other one-half (\$1,107,352.00) to MPA costs. EPA has estimated future Site costs associated with cleanup and EPA oversight of the Site to be approximately \$15,729,151.00 (\$15,529,151.00 in remedial costs; \$200,000.00 in EPA remedial oversight). Of that amount, approximately \$8,155,725.00 has been attributed by EPA to cleanup of the FDA (\$8,055,725.00 in remedial costs; \$100,000.00 in EPA remedial oversight). Future costs associated with cleanup and EPA oversight of the MPA are approximately \$7,573,426.00. (\$7,473,426.00 in remedial costs; \$100,000.00 in EPA remedial oversight).

EPA has assessed a premium, which each *de minimis* PRP must pay in addition to each PRP's percentage of FDA and MPA costs, in order to participate in the *de minimis* settlement with EPA. The premium is intended to take into account a number of Site factors and risks, including additional remedial action and potential response cost overruns, that EPA may encounter when settling with *de minimis* PRPs. EPA has established a premium of 50% in this matter, i.e. a multiplier of .50.

Malvern TCE Superfund Site Volumetric Ranking Challenges and EPA's Response

The Final Volumetric Ranking Summaries dated November 30, 1998 ("Summaries") reflect, among other things, revisions made by EPA in response to comments and challenges received from PRPs with regard to prior draft volumetric ranking summaries distributed by EPA for review.

A number of the comments and challenges submitted by PRPs were PRP-specific counting challenges, referring to individual PRP waste-in determinations of EPA. However, certain comments and challenges submitted pertained to the overall methodology utilized by EPA when preparing the Summaries.

The following sets forth the most common methodology comments and challenges reviewed by EPA and EPA's response to the same¹:

1. **COMMENT:**

The volumetric ranking summaries should include all broker/transporter PRPs at the Site. EPA should allocate generators and brokers/transporters percentage shares of liability at the Site.

EPA'S RESPONSE:

As a result of its review of Site documents, EPA has identified a number of PRPs that appear to have acted as brokers and/or transporters of waste to the Site. EPA has included all identified broker/transporter PRPs and broker/transporter transactions in the Summaries.

Most Site records that identify brokers/transporters refer to brokers/transporters with whom it appears that Chemclene dealt directly. A number of Site records, for example, reflect that Chemclene directly billed and/or credited such brokers/transporters with regard to waste

¹ This document is intended to discuss only common methodology comments and challenges submitted by Site PRPs to EPA. Any PRP that submitted a PRP-specific counting challenge may contact Gary Morton, EPA Civil Investigator, to obtain information regarding EPA's review of its challenge. Inquiries should be sent in writing to:

Gary Morton, 3HS11
Civil Investigator
U.S. Environmental Protection Agency, Region III
1650 Arch Street
Philadelphia, PA 19103-2029

transactions at the Site. A number of the brokers/transporters identified appear to have provided services involving the Site on behalf of a variety of generators.

The Site records that refer to broker/transporter PRPs typically identify two types of transactions: 1) transactions in which a broker/transporter appears to have arranged for the transport or disposal of or transported waste generated by a third-party to the Site, and in which both the broker/transporter and the generator are expressly identified in the corresponding Site record; and 2) transactions between a broker/transporter and Chemclene, where no third-party generator has been identified, but the party on the documentation acted as a broker/transporter in other transactions with Chemclene.

Whenever a Site record reflects a transaction in which both a generator PRP and a broker/transporter PRP are expressly identified, consistent with OSWER Directive 9835.16, ("Guidance on Preparing and Releasing Waste-In Lists and Volumetric Rankings to PRPs under CERCLA," dated February 22, 1991), EPA has attributed the waste volume referred to in each such transaction to both the generator and the broker/transporter for purposes of compiling waste-in information contained in the Summaries. However, EPA has counted the total waste referred to in these transactions only once for purposes of determining total waste contributed to the Site by all PRPs.

EPA has created a Generator VRS, which summarizes waste volume information for: 1) each generator PRP; and 2) each broker/transporter PRP only with regard to those broker/transporter transactions with Chemclene for which no third-party generator has been identified. In cases where a third-party generator is not identified, the party named on the invoice or other documentation has been treated as a generator for that transaction even if the party involved has been identified as a broker/transporter for other transactions. As a practical matter, it makes no difference to a party whether it is listed as a generator or a broker/transporter for a particular transaction - in either instance the transaction will be counted toward the party's total. The Generator VRS reflects the total waste contributed to the Site by all PRPs.

EPA has prepared a separate Broker/Transporter VRS in order to summarize those waste-in transactions in which both a broker/transporter and a generator have been identified. The waste volume reflected in these transactions also has been summarized for each corresponding generator in the Generator VRS. By preparing a separate Broker/Transporter VRS, EPA can attribute to each broker/transporter the waste reflected in these transactions, but avoid double-counting the waste when determining total waste contributed to the Site by all Site PRPs (as reflected in the Generator VRS).

2. COMMENT:

EPA erroneously counted as waste into the Site materials that were sent to the Site but shipped off-Site for disposal.

EPA'S RESPONSE:

Based upon its understanding of Chemclene's operations and its review of Site records, EPA has determined that some waste received by Chemclene at the Site was shipped off-Site for processing and/or disposal. Information available to EPA indicates that Chemclene often would containerize and store these wastes at the Site for off-Site shipment at some later date, and that releases or threatened releases of these wastes at the Site occurred as a result of Chemclene's practice.

EPA did *not* count waste transactions that appear to reflect that waste was sent off-Site for processing or disposal. In order for such transactions not to be counted by EPA, EPA must have been able to document that such wastes remained in their original shipping containers and were not bulk-stored or otherwise opened and handled on-Site, prior to off-Site shipment.

3. COMMENT:

Pre-1968 transactions with Chemclene should be included in EPA's waste-in determinations relating to the Site.

EPA'S RESPONSE:

Information currently available to EPA indicates that Chemclene utilized the Site for its waste reclamation operations from approximately 1959 to 1992. The Site records that have been utilized by EPA when preparing the Summaries refer only to the 1968 to 1992 time period. EPA has not attempted to incorporate pre-1968 transactions at the Site into the Summaries. EPA has no evidence as to the identity of PRPs or the quantity and/or nature of waste transactions with Chemclene during the pre-1968 time period, and is unable and unwilling to speculate as to this information.

EPA also has not identified pre-1968 transactions as transactions for which orphan share funding should be made available. When a PRP is unable to pay its allocated share of a cleanup, EPA may allocate such a share among the viable PRPs in the same ratio as other cleanup costs. Pursuant to EPA's "Orphan Share" policy, under certain circumstances, EPA may pay (from the Superfund) a portion of the shares for PRPs that are completely non-viable. Orphan share funding may be available only to PRPs that agree to implement and fund remedial actions at a site, and not to *de minimis* PRPs.

When EPA has been able to identify a Site PRP as an orphan, EPA has incorporated this information in the Summaries. EPA has not attempted to calculate any pre-1968 orphan share, since EPA has no information as to the identity of any pre-1968 Site PRPs, nor as to any such PRPs' current corporate status.

4. **COMMENT:**

The owners/operator of the Site should be included in the Summaries.

EPA'S RESPONSE:

EPA has identified Chemclene as a PRP based upon its Site owner/operator status. Lloyd Balderston, Chemclene's sole shareholder, has been notified of his status as PRP at the Site due to his position as a Site operator during periods in which releases occurred. In addition, Ruth Balderston has been identified as a PRP based upon her status as a past owner of the Site during a period in which releases occurred.

Chemclene and the Balderstons have not been allocated shares in the Summaries. In accordance with OSWER Directive 9835.16, the Summaries are designed to rank waste generators and brokers/transporters. Chemclene does not appear to have the financial capability to completely clean up the Site. Nevertheless, EPA considers Chemclene and the Balderstons to be viable PRPs who should participate to the fullest extent possible in Site remediation and funding.

5. **COMMENT:**

When determining PRP liability at the Site, EPA should take into account separate waste-in rankings for the Former Disposal Area ("FDA") and the Main Plant Area ("MPA"), areas of the Site utilized by Chemclene as part of its operations.

EPA'S RESPONSE:

Information available to EPA indicates that Chemclene utilized both the FDA and the MPA of the Site as part of Chemclene's operations. At all times during its operation, until approximately July 1992, Chemclene utilized the MPA to receive, accumulate, store, and process wastes, including hazardous substances. All wastes sent to the Site initially went to the MPA. Wastes, including hazardous substances, also were released and disposed of at the MPA as a result of Chemclene's operations.

Chemclene also disposed of wastes, including hazardous substances, at the FDA. Chemclene claims that disposal at the FDA ceased when new management took over the business in approximately August 1975, at which point Chemclene discontinued use of the FDA and disposed of waste generated from the reclamation process off-Site.

Based upon the foregoing information, when preparing the volumetric ranking summaries for the Site, EPA counted all waste transactions between Chemclene and PRPs during the 1968 to August 1975 time period as waste into both the MPA and the FDA. EPA has counted waste transactions occurring after August 1, 1975, between Chemclene and PRPs, only as waste into the MPA.

Each PRP's eligibility for *de minimis* status will be determined by reference to each PRP's percentage using the waste-in information for the MPA, where all waste into the Site was received and processed by Chemclene.

EPA has utilized the separate PRP waste-in rankings for the FDA and MPA in order to determine settlement payments that will be required by *de minimis* PRPs. The Site remedy selected by EPA in its Record of Decision dated November 26, 1997, has provided for distinct remedies for the MPA and FDA. Even though significant aspects of the cleanup of the MPA and the FDA may be combined, EPA believes that costs of the remedy can be allocated between the two areas. EPA has calculated settlement payments required of each eligible *de minimis* PRP by determining separately for the FDA and MPA the remedial and oversight costs associated with each of these areas of the Site, and then calculating each PRP's *de minimis* payment obligation with respect to these disparate costs.

EPA recognizes that PRPs that are not eligible for *de minimis* settlement may wish to allocate liability among themselves for disparate remedies selected for the FDA and MPA.

6. **COMMENT:**

Waste oil wastes should not be counted as waste into the Site.

EPA'S RESPONSE:

When preparing the Summaries, EPA assumed that all waste sent to the Site was either processed or stored at the Site. Although parties have stated that Chemclene only brokered waste oil, it is EPA's belief that waste oil sent to the Site was transferred on-Site and bulk stored. Additionally, waste oil components have been found at the Site at both the FDA and MPA. The Site remedy selected by EPA is designed to address solvents and other hazardous substances, including those typically found in waste oil, at the Site. Accordingly, unless a PRP making such a challenge provided EPA with an analysis of the actual waste sent to the Site, indicating that the waste did not contain hazardous substances, the waste was included in the Summaries.

Malvern TCE Superfund Site
Explanation Sheet for the Final Volumetric Ranking Summary (VRS)

The following provides an explanation of the information provided in the attached Malvern TCE Superfund Site (the Site) Final Volumetric Ranking Summary (VRS). Please refer to the example provided below for an illustration of the process used to calculate individual total payment.¹

<u>PRP Name</u>	<u>FDA Drums</u>	<u>FDA %</u>	<u>FDA Revised %</u>	<u>FDA Cost</u>	<u>FDA Premium</u>	<u>MPA Drums</u>	<u>MPA %</u>	<u>MPA Revised %</u>	<u>MPA Cost</u>	<u>MPA Premium</u>	<u>Total Payment</u>
ABC Corporation	34	1.49 %	1.52 %	\$141,249	\$62,182	82	0.29 %	0.30 %	\$26,325	\$11,483	\$241,239

PRP Name = The name of the specific potentially responsible party (PRP). Subsidiaries may be listed separately from parent companies; therefore, please review the VRS in its entirety to identify company subsidiaries that may have done business with Chemclene Corporation.

FDA Drums = The total number for drums sent to the Site before August 1, 1975.

FDA % = The total number of drums sent by the PRP prior to August 1, 1975, divided by the total number of documented drums received by Chemclene Corporation prior to August 1, 1975, multiplied by 100.

FDA Revised % = The total number of drums sent by the PRP prior to August 1, 1975, divided by the FDA total number of all non-orphan² drums received by Chemclene Corporation prior to August 1, 1975, multiplied by 100.

FDA Cost = The FDA Revised % divided by 100 and multiplied by \$9,263,078, the total past cost³ and estimated future cost associated with the FDA.

FDA Premium = The FDA Revised % divided by 100 and multiplied by the future estimated costs for the FDA (\$8,155,725) multiplied by the premium (50%).

MPA Drums = The total number of drums received at the Site, regardless of the date, for which the PRP is responsible.

MPA % = The total number of drums sent by the PRP, regardless of date, divided by the total number of documented drums received by Chemclene Corporation, multiplied by 100.

MPA Revised % = The total number of drums sent by the PRP, regardless of date, divided by the total number of non-orphan drums¹ received by Chemclene Corporation, regardless of date, multiplied by 100.

MPA Cost = MPA Revised % divided by 100 and multiplied by \$8,680,799, the total past cost² and estimated future cost associated with the MPA.

MPA Premium = The MPA Revised % divided by 100 and multiplied by the future estimated costs for the MPA (\$7,573,426) multiplied by the premium (50%).

Total Payment = FDA Cost + FDA Premium + MPA Cost + MPA Premium.

¹ The FDA Cost, FDA Premium, MPA Cost, and MPA Premium figures are rounded to zero decimal places for display purposes only. The full number is used in the calculation of the Total Payment.

² Non-orphan drums are drums for which there is either a viable generator or a viable broker/transporter.

³ The total past cost for the Site as of June 17, 1997, is \$2,214,705.00. Half of this cost was allocated to the FDA, with the other half being allocated to the MPA.

Malvern TCE Superfund Site
Explanation Sheet for the Final Volumetric Ranking Summary (VRS)

The following provides an explanation of the information provided in the attached Malvern TCE Superfund Site (the Site) Final Volumetric Ranking Summary (VRS). Please refer to the example provided below for an illustration of the process used to calculate individual total payment.¹

<u>PRP Name</u>	<u>FDA Drums</u>	<u>FDA %</u>	<u>FDA Revised %</u>	<u>FDA Cost</u>	<u>FDA Premium</u>	<u>MPA Drums</u>	<u>MPA %</u>	<u>MPA Revised %</u>	<u>MPA Cost</u>	<u>MPA Premium</u>	<u>Total Payment</u>
ABC Corporation	34	1.49 %	1.52 %	\$141,249	\$62,182	82	0.29 %	0.30 %	\$26,325	\$11,483	\$241,239

PRP Name = The name of the specific potentially responsible party (PRP). Subsidiaries may be listed separately from parent companies; therefore, please review the VRS in its entirety to identify company subsidiaries that may have done business with Chemclene Corporation.

FDA Drums = The total number for drums sent to the Site before August 1, 1975.

FDA % = The total number of drums sent by the PRP prior to August 1, 1975, divided by the total number of documented drums received by Chemclene Corporation prior to August 1, 1975, multiplied by 100.

FDA Revised % = The total number of drums sent by the PRP prior to August 1, 1975, divided by the FDA total number of all non-orphan² drums received by Chemclene Corporation prior to August 1, 1975, multiplied by 100.

FDA Cost = The FDA Revised % divided by 100 and multiplied by \$9,263,078, the total past cost³ and estimated future cost associated with the FDA.

FDA Premium = The FDA Revised % divided by 100 and multiplied by the future estimated costs for the FDA (\$8,155,725) multiplied by the premium (50%).

MPA Drums = The total number of drums received at the Site, regardless of the date, for which the PRP is responsible.

MPA % = The total number of drums sent by the PRP, regardless of date, divided by the total number of documented drums received by Chemclene Corporation, multiplied by 100.

MPA Revised % = The total number of drums sent by the PRP, regardless of date, divided by the total number of non-orphan drums¹ received by Chemclene Corporation, regardless of date, multiplied by 100.

MPA Cost = MPA Revised % divided by 100 and multiplied by \$8,680,799, the total past cost² and estimated future cost associated with the MPA.

MPA Premium = The MPA Revised % divided by 100 and multiplied by the future estimated costs for the MPA (\$7,573,426) multiplied by the premium (50%).

Total Payment = FDA Cost + FDA Premium + MPA Cost + MPA Premium.

¹ The FDA Cost, FDA Premium, MPA Cost, and MPA Premium figures are rounded to zero decimal places for display purposes only. The full number is used in the calculation of the Total Payment.

² Non-orphan drums are drums for which there is either a viable generator or a viable broker/transporter.

³ The total past cost for the Site as of June 17, 1997, is \$2,214,705.00. Half of this cost was allocated to the FDA, with the other half being allocated to the MPA.
